

## Welcome

### PROJECT BASICS

Acronym: EE-VET

Project ID: 2021-1-DE02-KA220-VET-000029591

Program: ERASMUS+, Action Type: KA220-VET

Project Type: Cooperation partnerships in vocational education and training

Target group: Teachers and trainers working in VET schools

Beneficiaries: VET students

Participant countries: Germany, Hungary, Latvia, Bulgaria, Lithuania

Project start: 01-11-2021

Duration: 24 months

Website:

<https://ee-vet.itstudy.hu/en/project>

energy consumption of buildings and reduction of CO<sub>2</sub> emissions.

With the acquired knowledge and competencies, electricians will be able to control building automation, monitor energy parameters, and monitor all building equipment, which will result in energy savings and savings in the most economical way.

The use of web-based learning will also improve the digital competencies of both learners and their trainers. The training modules will be created and recorded in all 6 languages of the project consortium (German, Hungarian, Latvian, Lithuanian, Bulgarian and English). The course will include digital assessments and interactive materials and will be open access.

### ABOUT THE PROJECT

The project aims to increase the professional skills and competencies of current and future electricians in the field of energy efficiency of the building electrical installations and thus help the European electrical industry to cope with the shortage of qualified professionals. By developing new professional skills and competencies to improve the building's energy efficiency, qualified electricians will be trained who will be a real engine of change - saving resources and compensating for the carbon footprint through the efficient use of energy in residential buildings

With the implementation of the project, up-to-date professional training on the energy efficiency of building electrical installations will be developed.

It will result in trained qualified specialists who will be able to apply modern technological solutions, leading to a reduction of

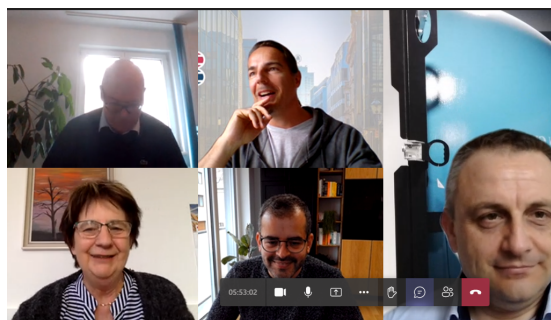

### KICK-OFF MEETING

On Wednesday 30th march 2022, the lead partner on the project Social CRM Research Center e. V. organized an online kick-off meeting for the Erasmus+ project EE-VET. During the meeting project partners discussed following key points:

- General Overview of the project to clarify aims, activities and responsibilities
- Overview of Intellectual Results
- Revision and refining the Work Plan as a whole, discussing potential risks
- Accompanying activities: project management, quality management and dissemination
- Reporting and financial matters
- Presentation of the project activities and time table
- Creating team project management. Development and approval of a detailed project management plan
- Approval of the Agreement between the partner and the coordinator

## FORTHCOMING PROJECT ACTIVITIES

1. Virtual meeting – to unify the structure of the modules. It will be defined soon.
2. Next transnational project meeting  
The second transnational project meeting will take place in September 2022, in Rezekne, Latvia

## PARTNERSHIP

**PROJECT COORDINATOR:** Social CRM Research Center e. V
